Introduction:

Thank you for purchasing this plugin and I hope you this will come in handy for your need. If you come across any issues please feel free to leave a comment on envato website and I will do my best to get back to you. Follow me on twitter [@myeventon](#) to stay in tune for the next release of the plugin update as I am planning to improve this plugin and add new features in the future.

Installation

Couple of ways to install the plugin.

1. download the zip file and in WordPress (WP) go to **Plugins> Add New > Upload** and select file and install plugin.
2. Unzip the content of the zip file to wp-content/plugins directory and then on WP back-end "activate" the plugin.

Once the plugin is activated

Go to **Plugins> Installed plugins** and you should be able to see "myEventON" plugin installed.

Important NOTE:

- When you install this plugin it will create a custom post type called Events with slug "ajde_events"
- Events created via this plugin uses a post slug of "events" and if you choose to place the event calendar in a page with a url like [www.ashanjay.com/events](#) - the calendar will not work. So please make a page with url like [www.ashanjay.com/events-directory](#) for the calendar plugin front-end to work on events achieve type pages.
- In order for the event calendar to properly work on front-end make sure to include `wp_header()` tag
- Google maps uses the javascript driven gmap API V3 setup and will only work for proper addresses

Other Questions and comments

Please feel free to leave your questions on envato page and I will try my best to get back to you as soon as I can.

Note from author:

I want to thank you very much for purchasing this plugin. This plugin was custom build from scratch with best code practices for better optimization. If you have any questions regarding the customization or any issue related to this program please feel free to drop me a message from envato.

Also if you have an ideas or thoughts to improve this plugin, I would love to hear your thoughts!

Enjoy!
